

1. 使用fork(), 创建100个子进程。
2. 每个子进程输出 I'm the %dth Child!\n , %d是第i个进程的编号i

```
~ ./100pfoc
I'm the 11633th child!
I'm the 11639th child!
I'm the 11636th child!
I'm the 11637th child!
I'm the 11647th child!
I'm the 11648th child!
I'm the 11649th child!
I'm the 11641th child!
I'm the 11651th child!
I'm the 11642th child!
I'm the 11643th child!
I'm the 11652th child!
I'm the 11654th child!
I'm the 11656th child!
I'm the 11659th child!
I'm the 11657th child!
I'm the 11660th child!
I'm the 11662th child!
I'm the 11663th child!
I'm the 11666th child!
I'm the 11667th child!
I'm the 11669th child!
I'm the 11670th child!
```

```
I'm the 11673th child!
I'm the 11685th child!
I'm the 11727th child!
I'm the 11729th child!
I'm the 11720th child!
I'm the 11730th child!
I'm the 11634th child!
I'm the 11726th child!
I'm the 11723th child!
I'm the 11728th child!
I'm the 11635th child!
I'm the 11732th child!
I'm the 11731th child!
100 children >>> THE END.
```
